# Calibration unified package

## Packages include:

- **4Sight2 calibration software**  
Druck's new 4Sight2 which is an easy-to-use, cost effective and scalable calibration management software.
- **Pressure calibrator**  
The industry leading Druck Genii multifunction calibrator enabling accurate and paperless calibrations for temperature, pressure and electrical devices.
- **Pressure modules**  
Choice of our best selling PM620 pressure modules in 2, 7 or 20 bar to cover multiple pressure ranges with one device.
- **Pneumatic pressure base**  
The PV621 pneumatic pressure base that can generate vacuum up to 20 bar without any additional equipment.

## What does the DPI 620 PC package offer?

A total end to end fully self-contained pressure test and calibration system.

All your assets are managed in 4Sight2 making planning simple with documentation maintained and ready to review at any time. You also get our world class pressure measurement and generation system where procedures and results can be instantly uploaded to 4Sight2 avoiding time consuming manual data entry and minimising errors.

\*Terms and Conditions: Purchase a DPI620PC package (Safe Area PN **DPI620PC-2barg**, **DPI620PC-7barg**, **DPI620PC-20barg** or Hazardous Area PN **DPI620SPC-2barg**, **DPI620SPC-7barg**, **DPI620SPC-20barg**). With HART capability (Safe Area PN **DPI620PC-H-2barg**, **DPI620PC-H-7barg**, **DPI620PC-H-20barg** or HART Hazardous Area PN **DPI620SPC-H-2barg**, **DPI620SPC-H-7barg**, **DPI620SPC-H-20barg**). All include Druck's latest 4Sight2 software for up to 35% off the combined list price of the individual products.

# 4Sight2 from Druck is your next generation solution for calibration and asset management.

4Sight2 is a dedicated calibration management software that provides full visibility of all your available assets, instruments, and resources.

Planning and notifications of upcoming calibrations all fully managed by 4Sight2 reducing missed or overdue calibrations.

Full analysis of an asset calibration history in an easy to view graphical format so you know the health of your assets and can plan accordingly, reducing down time.

One secure location that can be customised to suit your needs, simplifying audits and giving you the documentation you need.

Full uncertainty calculations giving highly accurate calibration data ensuring procedures are accurate, correct and compliant.

## Benefits

- Perform automated calibrations direct from 4Sight2
- Custom calibration certificate generation
- Full uncertainty calculations
- Improved process efficiency and data quality
- Ready for any audits on asset history
- Easy to use anywhere in the globe in 11 languages
- Paperless upload and download to portable calibrators
- Full one touch asset trending
- Automatic calibration scheduling with notifications
- Define and control calibration routines for any plant or location
- Total visibility of your assets and instruments
- Fully scalable - from a single user to a global multi-site operation
